**Radio Free Europe Official
Urges Far East Broadcasts**

WASHINGTON, March 24

(AP)—Crawford H. Greenwalt, chairman of the Radio Free Europe Fund, called today for privately operated radio broadcasts to the Far East to counter anti-American propaganda.

The success of Radio Free Europe in Eastern Europe, Mr. Greenwalt said, suggests consideration of such noncommercial broadcasts.

Mr. Greenwalt, chairman of the board of du Pont de Nemours & Co., spoke to the National Association of Broadcasters.

In another address, Gen. Bernard A. Schriever, commander of the Air Force Systems Command, compared United States and Soviet space achievements.

"It is still true," General Schriever said, "that we lead in some aspects of space exploration, such as total number of space shots, number of scientific probes, and practical applications of space satellites for such purposes as communications and weather observation."

"On the other hand, the Soviets lead in a number of areas with both propaganda and practical implications."
